

VC3008

Wall panel remote 45 x 45 mm

Product information:

The VC3008 is a flush mount wall volume controller, designed to be used in combination with the SX408A Bass cabinet. It is compatible with 45 * 45 installation materials. The volume is fluently adjustable by means of a potentiometer, and the connection between the controller and the SX408A is achieved by using UTP CAT5 cabling with RJ45 connectors. Available in Black (B) and White (W).
